PROFESSIONAL SUMMARY

Protocol-minded Full Stack Blockchain Developer focused on building production-grade Web3 systems beyond demo dApps. Experienced in designing smart contract architectures, market mechanisms, and real-time on-chain products across Solana and EVM ecosystems. Strong experience with stablecoin (USDC) integrations, oracle-driven systems, and end-to-end product delivery from contract logic to wallet UX.

TECHNICAL SKILLS

Blockchain: Solidity, Rust, Solana, Anchor, Ethereum, EVM, Hardhat, Chainlink, USDC, SPL Token, OpenZeppelin

Languages: JavaScript, TypeScript, Rust, Solidity, SQL

Frameworks & Tools: React.js, Next.js, Node.js, Express.js, Wagmi, Ethers.js, Web3.js, PostgreSQL, MongoDB, Git

PROFESSIONAL EXPERIENCE

Blockchain Developer Intern

Sep 2025 – Present

AppAvengers

- Built and optimized Solana programs using Anchor and Rust for production-oriented dApps
- Designed efficient PDA structures and instruction flows, reducing transaction failures by 25%
- Integrated wallet-based UX (Phantom) and connected on-chain logic with React/TypeScript frontend

Blockchain Developer Intern

Mar 2025 – May 2025

QuadB Technologies

- Migrated Solana-oriented systems to EVM-compatible smart contract architecture
- Developed modular Solidity contracts and integrated RPC-based interaction layers

Blockchain Developer Intern

Feb 2025 – Jun 2025

Finsocial Digital Systems

- Developed smart contracts for token swaps, futures trading, and decentralized exchange workflows
- Integrated Chainlink price feeds for real-time PnL tracking and market data reliability

KEY PROJECTS

BharatMarket (Prediction Market Protocol)

2026

Solidity, Hardhat, Chainlink, Next.js, TypeScript, Polygon, USDC | Live Demo

- Built a decentralized prediction market using CPMM-based pricing for YES/NO outcome trading
- Implemented liquidity pools, trading flows, and oracle-based resolution using Chainlink Functions
- Designed production-style architecture with real-time on-chain interaction and USDC settlement

CryptoLottery

Dec 2025

Solana, Rust, Anchor, USDC, SPL Token, Next.js | Live Demo

- Developed decentralized lottery system with transparent draw mechanics on Solana
- Integrated USDC payments and wallet-based participation flows
- Built secure program-level authorization and batch ticket purchase functionality

FantasyX

Solidity, ERC-721, IPFS, React, Wagmi

- Developed Web3 fantasy sports platform with NFT-based player cards and reward mechanics
- Implemented wallet onboarding and gameplay logic with token incentives

EDUCATION

B.Tech in Computer Science

Dec 2021 – May 2025

Indian Institute of Information Technology Vadodara

Secondary Education (Class VI – X) – Jawahar Navodaya Vidyalaya, Basmathnagar

Blockchain Developer Training Certification – QuadB Technologies (Mar 2025)
